

Warm greetings, I'm Mary Jones.

As a little girl, I loved to climb and sing at the top of trees, sitting under a canopy of green leaves, the breeze blowing, causing the sunlight to sparkle and dance on my skin.

I sang to the sun and sky in a way and language that helped me feel the Love of Home.

Years and years went by. The beauty of this connection has stayed with me. It has grown into a beautiful expression and invitation to remember the indescribable Love of Home.

Since then I've been singing my heart out. Because it's simply what I love to do most.

Heartsong works on many vibrational levels. It is multidimensional. As a result, people are guided to listen more with their hearts, instead of their brains, thus able to receive much more information in an expanded way. It also acts as a "carrier wave" for Divine energy, and can be of assistance in self healing, alignment and awakening cellular memory.

"Once you allow your brain to let go then you can finally start getting it. I don't think speakers can reproduce that vibration. When you hit certain notes, it was almost as if the overtones were so strong, I couldn't hear the note anymore. It was almost as if it was existing in another dimensional reality right next to mine." STEVE ROTHER <https://www.espavo.org/>

**I offer Heartsong Vibrational Healing concerts and private sessions internationally.**

I've been doing concerts in the USA and Europe since 2008. I sing in intuitive/channeled languages, also known as Light languages, that change in the moment, to accommodate the person or people I'm singing for.

I sing to music and also a capella. It is heart opening, relaxing, insightful, self empowering, creating sacred space for people to create their own miracles.

Every concert is unique, they are tailored especially for those present. I've given hundreds of concerts and hundreds of private sessions in the USA, The Netherlands, Germany, Norway and Istanbul, Turkey.

I'm pleased to offer this to anyone, and I am open to come to other countries as I'm invited.

---

## PRIVATE SESSIONS

The sessions vary in intensity and duration, and are recorded digitally for the clients to keep. They involve singing and speaking in Divine languages, also known as Light Language, that change for the person present, toning, overtoneing, and energy work.

These sessions can be done in person, or SKYPE.

---

## CD's

I have 3 CD's currently and they are being used by many practitioners in Reiki, Breath Work, Tai Chi, massage therapy, and for meditation and self healing.

When not on tour I work as a Registered Nurse/Case manager in a hospital in San Diego, Ca.

And I enjoy jewellery making and hiking.
